Finnish newspapers' layout analysis (METS package) 1771-1917

The layout analysis files from digitisation for Finnish newspapers, years 1771-1917.

Description

Zip packages, which contain METS XML for each binding. METS xml standard contains layout information of the materials and technical processing information.

Note! Due to improvements in materials, the few years back created ALTO XML export packages are not fully in sync with the METS information. I.e. some binding id's that exist in ALTO exports can be missing from METS, which have been generated in early September 2018.

OCR Ground Truth Package for Finnish Fraktur

Package contains 450 page images and ALTO XML files for each page, with the proofreading done by the Finnish native speakers.

Description

The pages of fraktur range from the year 1836 until 1910. The package can help in creating own postcorrection algorithms for OCR text recognition.

There is also an Excel file for all of the 471 903 words, which contains result given to the word by Tesseract and FineReader. If a tool hasn't found corresponding word, then the given cell is empty, so select the words in the Excel, which you need.

NB! The ground truth package does not contain the data for the 1918 due to copyright reasons.

Translocalis clippings 1820-1885

Translocalis clippings 1820-1885

Description

Translocalis is a digital database for reader letters written in different locations and published in Finnish papers up to the year 1885. The Translocalis database contains 72 000 reader letters from Finland and abroad. In the name of the collection, trans refers to an object going over or through something and localis refers to a space or location. Combined, Translocalis expresses something more than local, which these local letters represented. The Finnish-speaking press started out on a nation-wide level and became more regional and local only during the latter half of the 19th century.

User interface

<https://digi.kansalliskirjasto.fi/collections?id=742>

Data downloads

[Download here](#)

Zip package, which contains

- individual text file for each clipping text
- Log of downloaded clippings
- Clippings metadata excels 1820-1883 and 1884-1885

Folder Structure:

translocalis_data/year/ISSN/txt/388373_2973653_1457-4403_1868-04-09_15_page-2

- File name is formulated by article_id, binding_id, issn, publishing date (YYYY-MM-DD), issue, and page on which clipping has been taken.

Clippings metadata (2 files)

(part until 1883): translocalis_clippings_export_1820_1883.xlsx

(1884-1885): translocalis_clippings_export_1884_1885.xlsx

Fields in metadata excels:

Main title - name of the newspaper

ISSN - (International Standard Serial Number), i.e. newspaper identifier

Date - Publishing date of the number

Issue - Issue number of newspaper (can be empty, or contain A, Bs e.g. for extra editions)

URL - link to the clipping page

Title - Title of the article

Keywords - keywords of clipping (see [Wiki](#) for full explanations of translocalis_xyz fields)

Category - category of the article

Subject

Notes - if any extra notes

Created - when clipping was created

OCR - text contents of the clipping
